

NYLASTEX[®]

CAPABILITY STATEMENT

ABOUT US

Nylastex is a South Australian, family-owned advanced manufacturing company with over 30 years' experience, a passion for engineering and turning ideas into reality.

Our manufacturing facility is well-equipped and houses more than 25 CNC machines, including 3, 4, 5 and 9 axis CNC Mills and Lathes, 5 axis CNC Router, 5 Axis CNC Wire Cut machines.

Along with this, we also have Reverse Engineering, Laser Scanning and Inspection capabilities.

Our continual investment in the latest technology and qualified personnel enables us to provide a complete manufacturing service from project management and design advice, to prototyping and high volume production, all while exceeding our customers requirements in a timely and cost-effective manner.

Australian Metrology and Calibration, a trusted member of the Nylastex group of companies and a NATA accredited laboratory, can provide customers with inspection reports to meet their quality requirements.

OUR KEY INDUSTRIES

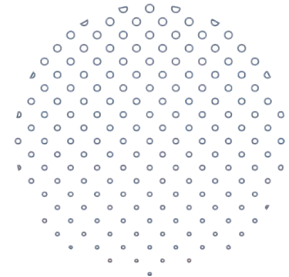

DEFENCE

A trusted partner in defence

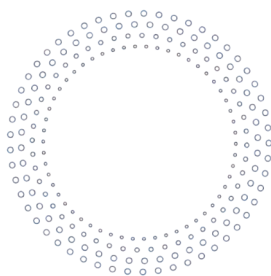

AGRICULTURE

Collaborative solutions for sustainable farming

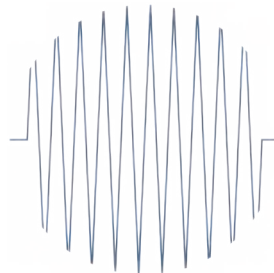

MINING

Dependable, cost-effective advanced manufacturing

AEROSPACE & SPACE

Looking to the future

MEDICAL

Precision, accuracy and quality verified

ENERGY & RENEWABLES

Committed to advancing renewable energy

CAPABILITIES

- Project Management & Design
- Precision CNC Machining
- Rapid Prototyping
- Assemblies & Sub-Assemblies
- Low Volume Machining
- High Volume Production Machining
- Material Sourcing
- Metal Finishes & Treatments
- Paintings & Coatings
- CMM Scanning
- 3D Printing
- Reverse Engineering
- Fabrication
- Quality & Inspection
- Through Life Support

FACILITIES

- Factory 1
 - Edwardstown Precision Manufacturing Facility
 - 2,500 sqm
- Factory 2
 - Edwardstown Assembly & Warehousing
 - 800 sqm
- Factory 3
 - Edinburgh Special Projects Facility - Energy efficient affordable housing
 - 1,500 sqm

KEY PERSONNEL

- Geoff Philips - Director & Chief Technical Officer
- Adam Philips - Business Manager
- Heath Jenner - Business Development Manager
- Peter Anderson - Operations Manager
- Courtney Brannigan - Quality Manager

ACCREDITATIONS

- ISO 9001:2015 – Quality Management System
- DISP Level 1 Membership
- NATA ISO/IEC 17025

SIGNIFICANT PROJECTS

Project: Agriculture
Year: Ongoing
Value: \$5,000,000 per annum
Description: Manufacturing components and assemblies for harvesting machinery and specialised equipment for processing plants.

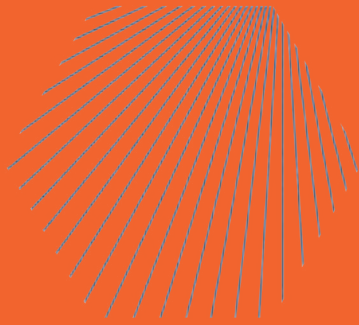

Project: Defence
Year: Ongoing
Value: \$500,000 per annum
Description: Repairs, maintenance and supply of components and assemblies for Collins Class Submarines.

Project: Medical
Year: 2020
Value: \$1,000,000
Description: Manufacture and through life support for special purpose equipment for medically approved masks.
