

Helping safeguard your organisation from cybersecurity threats and IT incidents.

Specialising in information security and technology services, our expert cybersecurity team is a collection of the best and brightest minds in the field, with extensive experience and proven expertise. We ensure your cyber program delivers secure and robust systems (to a defence-grade standard), whilst facilitating highly secure and resilient IT infrastructure.

Specialist expertise in defence and critical infrastructure

Meeting regulatory and legislative compliance, Secure State has a proven history safeguarding Defence industry IT systems. Our highly vetted, security-cleared team is experienced with security protocols for sensitive or classified information.

We are the first registered certification provider of the US Department of Defense Cyber Maturity Model Certification (CMMC) program.

Our experience working with frameworks from the US (ITAR, NIST and CMMC) and UK (Cyber Essentials and Plus), along with Australia's relevant frameworks (Essential 8, DISP, PSPF and ISM), enables us to assist with Defence industry projects.

OUR KEY SERVICES

Cybersecurity Advice & Implementation

IT Maintenance & IT Managed Services

Proudly Aboriginal Owned & Operated

Supporting sovereign capability with assessment, implementation, and ongoing support

Helping your organisation achieve operational resilience

Providing timely, high-level technical advice, we take pride in our ability to cause minimal interruption to your daily operations. Proficient at delivering cyber awareness training, we also set up and manage IT infrastructure with day-to-day helpdesk support. Our services complement and extend your internal resources, ensuring a continuity of secure IT performance.
