

Centralian Controls is a technical sales and service organisation, established in 1987, specialising in process control, industrial automation equipment and packaged solutions.

Our capability extends to the design and construction of a wide range of complete / prefabricated systems and packages, utilising in-house engineering knowledge and an extensive workshop facility.

Packaged systems and solutions include, (but are not limited to)

- RTU / PLC / (Brodersen / Emerson) electrical control panel fabrication.
- Cathodic protection systems - (solar powered and mains powered).
- Solar power systems.
- Remote camera / telemetry skids
- Chemical injection / Chemical dosing systems - solar powered and pneumatic.
- Skid I&E / Mechanical fit-out services.
- Instrumentation / HA Hazardous Area applications
- Variable Speed Drives (VSD / VVVF) solutions.
- Power Quality solutions.
- Lightning prevention solutions.
- Radio / Telemetry solutions (Elpro).
- MCC (Motor Control Centre) and distribution switchgear (Eaton) solutions.
- SCADA (GE Digital) solutions. (iFix / Cimplicity)
- Cyber Security solutions (Opswat).
- HMI / panel mount visualisation solutions (Beijer)
- 3D printing solutions (Markforged)

Major industries serviced and supported by Centralian Controls include:

- Oil & Gas sector, (production, processing, transmission and distribution),
- Water and Wastewater,
- Defence,
- Metals and Mining,
- Utilities,
- Food and Beverage,
- Pulp and Paper
- Infrastructure.
