Smart Alarms and Reporting

- Ensure Immediate Response with Reliable Smart Alarms
- Gain valuable insights into your plant's health from anywhere at any time.

- Modular RTU with or without integrated I/O and communication device.
- Real Time Linux Operating System.
- KEMA Certified Communication Protocols include (>20 available)
- Full Modbus Suite. IEC60870-5-101/103/104 IEC61850 Client / Server Protocol
- DNP3 Master & Slave. OPC UA Binding
- Global Distribution and Subscription of Event Based Time Stamped Variables.
- Communication Protocols can also be created in the logic application interface.
- Communication interfaces: 2 x Ethernet 10/100, 1x USB on the CPU module.
- Full EN/IEC61131 PLC runtime – also used for special and flexible data manipulation.
- Includes power supply monitoring of the RTU32M supply voltage and temperature.
- Support for redundant power supplies and CPUs. - Hot swappable I/O.

ELPRO offers scalable industrial wireless solutions from basic point-to-point or meshing to large scale infrastructure deployments.

Applications include water/wastewater, mining, oil and gas, environmental, electricity utilities, building automation and irrigation / agriculture.

Offerings include scalable solutions from basic point-to-point or meshing to large scale infrastructure deployments

SOFREL LogUp

- Robust and scalable 4G data logger
- A single, scalable model for all water network monitoring

MY SOFREL LogUp app

- Simplify commissioning

LX CONNECT centralization platform

- Simple fleet management,
- Cybersecurity
- SCADA data transfer

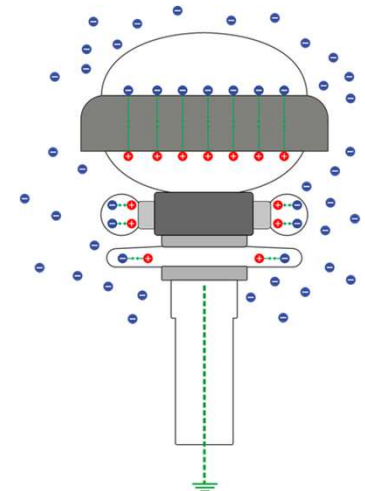

CMCE TECHNOLOGY

Designed to always balance and de-ionize the effects of atmospheric charge through multiple compensators,

Its operating principle is based on compensating, stabilizing the electric field existing in its environment,

Electrical law – A balanced charge will not create a condition for a Strike

Cancelling the formation of the ascending tracer, neutralizing the possibility of discharge, draining the electrical charges to the ground, in harmless milliamperes.

SENSA.iO

by EDGE TECHNOLOGIES

LoRaWAN Intrinsically safe sensors for hazardous areas (Zone 0/1)

- IECEx / ATEX Approvals
- Compact, robust and weather-proof
- Quick and cost-effective installation
- Cortex® 150Mhz-M4 for analytics at edge
- LoRaWAN Global frequency plans
- End-to-End Security: Inc.
- 128-bit AES encryption + MFA
- Bluetooth® 5 Low Energy
- Ultra-low power up to 10 years battery life

Advantech Industrial Communication and Networking

ATMOS Leak Detection

**Providing pipeline leak detection,
theft detection and simulation technology
to the oil, gas, aviation, chemical, water and mining & slurry industries.**

Versatile Solutions

- leak detection
- theft detection
- pipeline optimisation
- pipeline simulation
- pig tracking
- batch tracking
- hydraulic profiling
- tightness monitoring

Whatever Flows

- oil
- gas
- chemical
- aviation fuel
- slurry
- sand
- water
- others

Wherever It's Located

- above ground
- below ground
- subsea
- rural
- urban
- factory
- farm
- residential

- BASE
- PRO
- MARINE
- CONTROL
- EXTREME
- WEB HTML5

Many versions and sizes 5" – 21"

Ruggedised and high bright screens options

Extensive driver list including AB EIP

Free Software iX Developer

Vector Graphics for scaling up / down screen size

Beijer

ELECTRONICS

- Intrinsic Safety
- Signal Conditioning
- HART Interfacing
- Fieldbus
- Industrial Security
- Industrial Wireless
- HMI and Visualisation
- Surge Protection
